

**Personnel Fall
Protection**

STAND-OFF MOUNTING SYSTEM

INCREASED FALL PROTECTION THAT WON'T LET YOU DOWN

The Stand-Off Mounting System is an optional railing attachment that creates increased platform space on the mezzanine edge. This product provides a steadying point on the platform for personnel to utilize when transitioning through the Ladder Safety Gate. It easily mounts to your existing railing system and can be used with our Ladder Safety Gate, Paired Ladder Safety Gate or Full Height Ladder Safety Gate products to maintain OSHA railing requirements.

IMPROVES SAFETY ON THE MEZZANINE:

- Adds 7-1/2" of stand-off clearance space on the platform edge
- Provides a grab point for personnel to use while entering or exiting the elevated platform

INSTALLS QUICKLY AND EASILY:

- Mounts directly to existing railing system
- Adjustable to meet railing height requirements
- Functions in tight spaces; allows for interferences from additional equipment placement or irregularities in platform or deck structure
- Can be used with PS Safety Access™ Ladder Safety Gate, Paired Ladder Safety Gate or Full Height Ladder Safety Gate products

ADDITIONAL OPTIONS:

- Custom systems are available to meet your building requirements
