EDGESAFE®
Personnel Access Gate

EDGESAFE® PERSONNEL ACCESS GATE (EPAG)

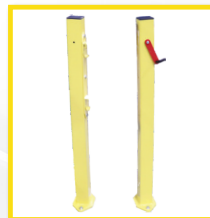

THE ONE GATE YOU NEED FOR BIDIRECTIONAL TRAFFIC CONTROL

Effectively caution personnel of dangerous or off-limit areas in your facility with the EdgeSafe® Personnel Access Gate from PS Safety Access™. Designed to swing bidirectionally (both ways), this durable floor-level gate serves as a single access point for personnel to safely enter or exit restricted areas. As versatile as it is functional, this gate is the ideal solution for protecting areas in which personnel and forklifts share the same traffic spaces. With unmatched spring life (tested to 1 million cycles), the EdgeSafe Personnel Access Gate is ready to provide effective, yet silent, operation for years to come.

- **Keeps Personnel Safe** - The EdgeSafe Personnel Access Gate swings both ways to alert pedestrians about an upcoming area
- **Simplifies Traffic Control** - Managing traffic is easier when you limit it to one access point
- **Effectively Displays Warning Information** - Warning signage (not provided) is simple to affix to the gate
- **Built To Last** - Mild steel construction and a durable powder coat finish make it ideal for repetitive use
- **Adjustable To Fit Your Opening** - Adjusts from 21" to 48" and attaches to existing railing
- **Silent Operation** - Makes no sound as it closes
- **Compatible With Additional EdgeSafe Products** - The optional Mounting Post Kit (part #515088, sold separately) makes it easy to mount the gate at areas where there is no existing railing – complete safety packages available
