

Always In Place

Self-Stores,
Pivots Open

FLOOD HATCH

THE TOP CHOICE FOR UNDERGROUND FLOOD PROTECTION

The Flood Hatch from PS Flood Barriers™ is the perfect flood-protection solution for underground utilities, tunnels and subway systems. Always in place, the Flood Hatch provides a watertight barrier, protecting important assets that are located below the surface.

POWERFUL 24-HOUR PROTECTION

- The Flood Hatch is always in place, providing convenient, passive flood protection
- 100% customizable to provide unbeatable protection in even the most unique applications

CONVENIENT STORAGE

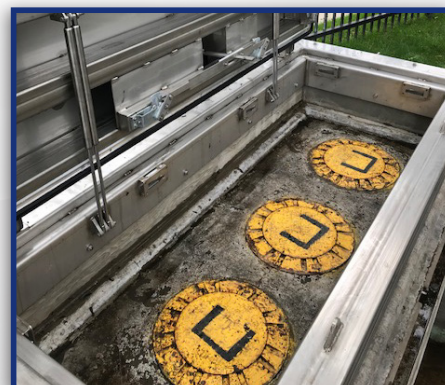

- If needed, this hatch can self-store within a walk/drive surface, allowing the surface to be used while the Flood Hatch is in place
- This hatch can be engineered to meet H-20 vehicle loading standards on roadways

PROVIDES EASY ACCESS

- When access is needed, the flood hatch easily pivots open

SAFETY FEATURES AVAILABLE

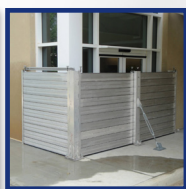

- An emergency egress is available from the underground side
- The hatch can include an above-ground secured locking system
