FLEX-GATE® BOTTOM DEPLOY (FGBD)

FLEXIBLE FABRIC FLOOD PROTECTION THAT'S READY WHEN AND WHERE YOU NEED IT

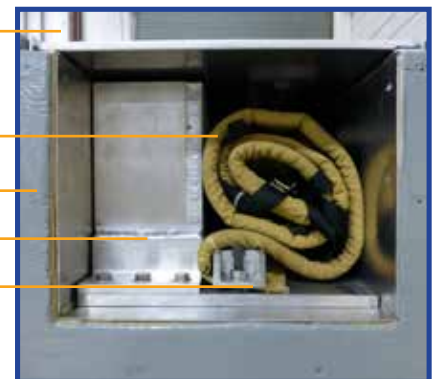

The Flex-Gate® Bottom Deploy is a high-strength fabric wall that can be deployed rapidly for flood protection around and between buildings, across doors of any size or in front of glass. It can be scaled to withstand any water height and can be shaped to fit around any structure, including corners of any angle. The Flex-Gate Bottom Deploy is simple to operate and can be easily deployed or stowed away. It is stored in a covered trench at the point-of-use so that all materials and components are available when needed.

Flex-Gate Bottom Deploy Benefits

- **Point-of-use Storage** – Deploys at the last moment for minimal operational disruption
- **Rapid Deployment** – Deploys quickly with powered operation (chain fall backup if power outage occurs)
- **Compact Stowage** – Stores in small spaces
- **Scalable Design** – Can be sized to fit any vertical opening
- **Robust Materials And Construction** – Withstands debris impacts (with optional debris netting)
- **Variety Of Configurations** – Available in configurations to build both short and tall walls
- **Prevents Flooding** – Seepage is less than 0.1 gal/min/ft of perimeter
