 Corrosion Resistant

FLEX-GATE® STAIRWELL (FGS)

UNBEATABLE FLOOD PROTECTION FOR TUNNELS, DOORS OR PORTALS

The Flex-Gate® Stairwell is a high-strength, dry flood-proofing closure that can be deployed rapidly for flood mitigation of tunnels, doors or portals of any kind. It can fit openings of any shape, size or orientation. The Flex-Gate Stairwell functions similarly to a window shade or roll-up storefront security door in that it resides in a small container and is pulled across the opening when an event occurs. Deployment can be performed manually by one person in a matter of minutes. Plus, it features few moving parts, resulting in increased reliability with minimal maintenance and low life-cycle costs.

Flex-Gate Stairwell Benefits

- **Point-of-use Storage** – Deploys at the last moment for minimal operational disruption
- **Rapid Deployment** – Deploys in minutes by a single person to secure the site
- **Compact Stowage** – Stores in small spaces
- **Scalable Design** – Can be sized to fit any opening
- **Variety Of Configurations** – Available as a horizontal barrier (ideal for stairwells or ventilation shafts) or a vertical barrier (ideal for stairwells, person/vehicle doors, car/rail portals, loading docks, etc.)
- **Prevents Flooding** – Seepage is less than 0.5 gal/min/ft of perimeter
