ARMORBOSS™ BUS SHIELD (ABB)

BRINGING PEACE OF MIND TO PUBLIC TRANSIT

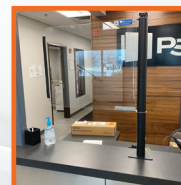

Everyone deserves to feel safe while riding the school bus, including the driver. That's why PS Public Protection™ specifically developed the ArmorBoss™ Bus Shield to provide protection and peace of mind in this critical component of public transportation. Not your everyday sneeze guard, these purpose-built shields serve as a protective barrier that limits the transmission of germs between the driver and passengers. Constructed from clear acrylic plastic for easy cleaning in between routes, ArmorBoss Bus Shields allow the driver to stay safely separated from passengers while maintaining a clear view of the bus's interior.

- **Limits the transmission of germs between driver and passengers** – The ArmorBoss Bus Shield blocks the germs that result from sneezing and coughing, inhibiting their transmission between the driver and passengers throughout the bus
- **Made from durable, clear acrylic plastic** – Stands up to years of use and is easy to keep clean
- **Adjustable to fit a variety of interiors** – Shields can be quickly adjusted from heights of 68" to 78" to accommodate a variety of interior layouts
- **Quick and easy Installation** – Simply bolt the poles included on the ArmorBoss Bus Shield to the floor and ceiling of the bus for sturdy driver/passenger protection
- **Available in two models** –
ABB-TYPE A (23.5" width x 31.5" height)
Designed to fit: Type A ("smaller") school buses,
Type B school buses

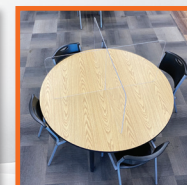

ABB-TYPE C (31.5" width x 40" height)
Designed to fit: Type C ("traditional" / "conventional") school buses, Type D ("transit-style") school buses, people mover buses
